Relevant Coursework

- Flutter
- Dart
- Data Structure
- Google Firebase
- State Managements
- REST API
- Hive
- Java Script

Experience

Flutter Developer   **Oct 2022 – present**
Android/iOS   *Calicut, Kerala*

- I'm a determined, self-taught Flutter Developer with a strong command of both Dart and Flutter Framework, having successfully completed two major Android projects.
- Expertise in Google Firebase for seamless application development, feature-rich applications across iOS and Android.
- With 1 year and 2 months on professional experience, I consistently devote 60 hours weekly to advancing my proficiency as a Flutter Developer.
- Collaborated with team members using version control system such as Git to organize modifications and assign tasks.
- Utilized VS Code and Android Studio as a development environment in order to visualize the application in both iOS and Android.

Projects

Social Flow - *Flutter, Google Firebase, Provider*   **October 2023**

- The app is built using Flutter, making it compatible with both Android and iOS devices, providing a seamless user experience across different platforms.
- The app fosters social interactions with features like liking, commenting, sharing, and direct messaging, enabling users to connect, communicate, and build communities around shared interests.
- Leveraging Google Firebase's real-time database capabilities, users can receive instant updates on posts.
- By utilizing provider, enabling seamless data flow and synchronization across different parts of the application.
- ⊙ Git Hub Repository

Musician - *Flutter, Hive, Provider*   **may 2023**

- Developed a music player application using flutter, optimized for Android devices, providing a responsive and seamless experience on the platform.
- Implemented data retrieval from local storage, allowing users to access and manage their music library directly within the app.
- Utilized Hive, a lightweight and efficient NoSQL database, to manage and storage music metadata.
- Adopted state management with Provider, effortlessly aligning with the Flutter ecosystem, and perfectly fit for this app.
- ⊙ Git Hub Repository

Netflix Clone - *Flutter, TMDP API, Bloc*   **February 2023**

- Designed and developed visually stunning Netflix clone application using flutter, replicating key features and functionalities of original platform to provide users with an immersive streaming experience.
- Integrated the TMDB (The Movie Database) API to dynamically fetch and display a vast collection of movies.
- Crafted advanced state management using the Bloc (Business Logic Component) pattern.
- ⊙ Git Hub Repository

Technical Skills

Front End: Flutter, Android/iOS, State Managements(Bloc, GetX, Provider), CSS, Animations
Languages: Dart, Java, JavaScript, C, HTML
Technologies/Frameworks: macOS, Git, GitHub, postman, Figma

Education

Higher Secondary   **Jun. 2018 – Mar 2020**
GHSS PANG   *Pang Chendi, Kerala*

Flutter Development   **Oct. 2022 – present**
BROTOTYPE   *Calicut, Kerala*
